WIREFRAME OF A BOOKLIST

Introduction

Purpose and Goals

The Purpose of my application is to create a booklist with three main functions:

1. Add new books
2. Store list of books to read
3. store list of books that have been read

Add new books

Homepage Wireframe

This home page will inform users about how to use the web application as well as allow users to add books to the "books to read" list using the form fill. There will also be a navigation that allows users to toggle between the homepage, books to read, and books read pages.
